About

- Salimli Ayzek, 4th year student at SPbPU, ICCS, Mathematics and Computer Science, AI Systems and Supercomputer Technologies. Work experience: 1 year 5 months at The Blooms Bridge, AI systems integration (RAG, Computer Vision, etc.) and back-end development. I mainly position myself as a Junior Software Engineer. I can also take work such as - hyperparameter tuning, training models, interpreting results, data labeling, and computer vision.
- My professional interests include computer vision, statistical and machine learning algorithms, neural networks, functional programming, optimization methods, statistics, and discrete mathematics.
- Outside work: travel, philosophy (especially how cognitive thinking and foundational ideas connect with computer science), football, and neue deutsche harte.

Projects

Web

- Quotes from Movies and Cartoons
- Data Encryption and Decryption

Soft

- Free MP3 Player iOS: AyzeksSound
- Game of Life on CA
- TG-Bot Price Tracker: PriceCheckerBot
- TG-Bot Trip Planner: SpringTripPlannerBot
- HTTP Server on Java
- Card Management Service

Math

- MathLang Presentations
- Educational Projects
- Forecasting and Comparison of Demographic Indicators of Russia and Japan

- Regression analysis of the consequences of the reduction in gas export

Education

- **School (complete secondary):** Azerbaijan. Baku. School №53 (with mathematics focus).
- **Higher education:** Russia. Saint Petersburg. Peter the Great St. Petersburg Polytechnic University. Institute of Computer Science and Cybersecurity. Program: Mathematics and Computer Science - Artificial Intelligence Systems and Supercomputer Technologies. Graduate School of Artificial Intelligence Technologies.

Experience

- **The Blooms Bridge** - Backend developer (20.07.2024 - now)

Articles

- Computer Vision for Offside Detection in Football
- Construction of a zone of interest for tram rails based on their segmentation

Knowledge

Category	Type	Technologies / Libraries
Programming Languages	Multi-paradigm	C++ Python
	Object-Oriented (primarily)	Java
	Functional	Haskell
Data Science & ML (Python)	Data Manipulation	PANDAS
	Data Visualization	MATPLOTLIB SEABORN
	Deep Learning	PYTORCH YOLO (Ultralytics)
	Machine Learning	SCIKIT-LEARN
	Scientific Computing	NUMPY
Quantum Computing	-	CIRQ
Frameworks	-	Django Spring (Core, Boot, Web, Data JPA, Security)

Databases (DBMS)	NoSQL	MongoDB
	SQL	MySQL PostgreSQL
Mathematics	-	• Discrete Math • Graph Theory • Linear Algebra • Calculus • Mathematical Statistics & Probability Theory • Optimization Methods • Quantum Computing
Message Brokers	-	RabbitMQ
Containerization & Hosting	-	Docker Kubernetes Firebase Render
CI/CD	-	Jenkins Terraform Ansible HEAT OpenStack Heat
Documentation	Documentation & Reports	LaTeX Markdown Typst
	Presentations	LaTeX (Beamer)

Learning Hub (on progress)

- *Computer Science*
- *Mathematics*
