SKILLS

ML / DS

Python, PyTorch, TensorFlow, Ultralytics YOLO, FastAPI, Scikit-learn, Scikit-image, NumPy, Pandas, Matplotlib, Seaborn, LangChain, OpenAI API, Hugging Face, Computer Vision

DevOps / CI-CD

Docker, Kubernetes, Terraform, Ansible, Jenkins

Databases

PostgreSQL, MySQL, MongoDB, Redis

Brokers

RabbitMQ

Maths & Theory

Statistical ML, Probability Theory, Mathematical Statistics, Optimization Methods, Algorithms & Data Structures, Discrete Mathematics, Quantum Computing

Other Langs / Frameworks

Haskell, C++, R, Java, Spring, Hibernate, Spring JPA, Spring JDBC, Maven, Gradle, Concurrency

LANGUAGES

Russian

Native

English

B2

Azerbaijani

Intermediate

INTERESTS

Computer Vision, Mathematical Modeling in AI, Travel, Football, Music

Ayzek Salimli

ML Engineer

Professional Summary

ML Engineer with a strong mathematical and statistical background, finishing a Bachelor's degree in *Mathematics and Computer Science* at SPbPU. Practical experience developing computer-vision and deep-learning models (PyTorch, TensorFlow, Ultralytics YOLO), integrating LLM solutions (LangChain + OpenAI API), solving vehicle-routing problems (VRP/DVRP) with optimization methods, and building production systems on FastAPI. Proficient with the DevOps stack (Docker, Kubernetes, Terraform, Ansible, Jenkins). Author of scientific publications in computer vision.

Work Experience

ML Engineer & Back-end Developer

08/2024 – 01/2026

TheBloomsBridge

- ▶ Integrated and fine-tuned an LLM on proprietary data using LangChain and the OpenAI API.
- ▶ Built computer-vision and predictive models (regression, multivariate analysis of variance).
- ▶ Solved vehicle-routing (VRP) and dynamic vehicle-routing (DVRP) problems via optimization methods.
- ▶ Developed a custom control dashboard on FastAPI.
- ▶ Deployed ML applications on Firebase and Docker.

Education

Master's Degree - Mathematics and Computer Science

07/2026 – 07/2028

Peter the Great St. Petersburg Polytechnic University

- ▶ Program: Machine Learning and Artificial Intelligence, ICCS, Graduate School of AI Technologies (preliminary enrollment).

Bachelor's Degree - Mathematics and Computer Science

09/2022 – 07/2026

Peter the Great St. Petersburg Polytechnic University

- ▶ Thesis: algorithm for detecting foreign objects on tram tracks based on their segmentation.

Publications

- ▶ [Application of Computer Vision Methods for Determining Offside Position in Football.](#)
- ▶ [Construction of a Region of Interest Based on Segmentation](#) - Proceedings of the Science Week, p. 386 (*recognized as one of the best papers*).
